Embrace The EDGE

Is your approach to The Edge driving digital transformation & accelerating outcomes?

Competing in a Digital World
Digital transformation is underway in every industry and in companies of all sizes. Fueled by mobility and the Internet of Things, we're experiencing an explosion of devices and connectivity. Those that are at the forefront of this transformation stand to win big – disrupting entire industries and accelerating business outcomes and velocity. The rest could lose out – perhaps catastrophically.

Why Focus on the Digital Edge?
The Digital Edge is that space in-and-around offices, retail locations, hospitals – virtually any facility where people and devices meet. It's where data is created and consumed. Where applications are shared. But to make the magic happen, the Digital Edge needs to be transformed through more intelligent solutions.

Why Focus on the Digital Edge?
The Digital Edge is that space in-and-around offices, retail locations, hospitals – virtually any facility where people and devices meet. It's where data is created and consumed. Where applications are shared. But to make the magic happen, the Digital Edge needs to be transformed through more intelligent solutions.

Rely on Black Box
Black Box is a trusted partner in the Digital Edge ecosystem for many of the biggest names in a wide range of industries. And we specialize in delivering the Intelligent Digital Edge.

Challenges at the Edge
Despite the increasing number and diversity of devices and applications that are overwhelming network, computing, and even IT staff resources, fundamental milestones must be achieved to create the Intelligent Digital Edge. Without them, you’ll forever realize the full potential of digital transformation.

Embrace the Edge with Black Box
Utilize our unique strengths to create an Intelligent Digital Edge of your own – so you can adapt quickly to changing technology and business requirements – and supercharge innovation, scale and velocity.

Leverage Foundational Technologies
From personalized experiences, to physical security, team collaboration tools and IoT devices, we can help you drive business outcomes.

Layer-in Enabling Technologies To Drive Outcomes
From fictional experiences, to physical security, team collaboration tools and IoT devices, we can help you drive business outcomes.

Simplify Large-Scale Deployments at the Edge
Create uniform experiences across multiple locations with consistency, speed and agility – regardless of the amount of technology deployed or location around the globe. In fact, with extensive highly trained technicians we managed 12,000+ deployments in North America and your area.

Rely on Black Box
Black Box is a trusted partner in the Digital Edge ecosystem for many of the biggest names in a wide range of industries. And we specialize in delivering the Intelligent Digital Edge.

We have more than 40 years of experience connecting people, devices and data, and more than 15 years of experience successfully engineering the first true scalable, secure, and manageable Smart Edge Enterprise & Campus solutions. From high-speed connectivity, Manufacturing and Retail, to Interactive Kiosks, People Countering, Smart Boards, and Climate Control, we leverage the power of Cloud, IoT, and Analytics to deliver the most secure, reliable, and intelligent digital solutions available.

As a full-service partner to our clients, we can get it right the first time, at right price. And that typically means deploying 100s, 1000s, to 10,000s, 100,000s. From single locations, to enterprise, to entire enterprise across multiple locations, we are there. Whether you need to connect, collaborate, or collect data, we have the capability to make the magic happen.

Our proactive managed service includes everyday operations like service desk, monitoring, maintenance and troubleshooting. Plus, the peace of mind provided by our simple, direct and straightforward service level agreements. It’s about delivering our capabilities cost-effectively and with a higher level of visibility and control.

Where the magic of digital transformation happens.
