

RingCentral Office® Premium™ Edition

Empower your business to communicate, collaborate, and connect via voice, team messaging and collaboration, audio and video conferencing, and fax from any location and on any device. RingCentral Office provides a complete business communications and collaboration solution that is flexible and completely scalable, so it can grow and adapt to meet your company's ever-evolving needs.

Use RingCentral Office Premium edition as your unified communications and collaboration solution and enjoy:

- Streamlined communications through a rich set of capabilities
- Comprehensive integrations with today's leading business applications
- Simplified provisioning, activation, and management of global solutions
- Robust call and user monitoring features
- Multi-site support for your different branch locations
- HD video conferences with up to 100 attendees
- 2,500 toll-free minutes
- Real-time analytics and reporting tools
- Unparalleled ease of use
- Ultimate mobility and access
- Enterprise-class security
- Reliable call quality

Powerful scalability and flexibility

RingCentral Office Premium edition delivers a highly scalable cloud-based phone system that provides significant flexibility in managing your rapidly growing business operations. Our agile

platform-based solution facilitates timely and rapid network and device configuration, automatic product upgrades and innovations, and flexible monitoring and management tools, helping ensure that your organization scales according to the latest industry trends.

World-class security and reliability

Robust security measures are implemented at every level of RingCentral's architecture and processes and our full-time security and fraud-prevention department works to ensure the physical and environmental security of your service 24/7. Enjoy peace of mind knowing that our distributed network is fully redundant in every location we serve, providing a truly global infrastructure that consistently delivers the service continuity and quality you deserve.

Simplified administration

As your business scales and grows, your growing networked locations create more complex operations with unique management challenges. RingCentral's multi-site support feature gives you the flexibility to manage and support your branch offices based on their unique operational needs. Use our centralized web-based dashboard to easily manage all your users and locations—anytime, anywhere, on any device.

Team collaboration

Use RingCentral Meetings™ to hold high-definition video conferences with up to 100 participants, utilizing advanced collaboration features, including screen sharing, web sharing, file annotation, and more. The RingCentral app provides a unified team workspace that allows your employees to share conversations, files,

tasks, and calendars. Bring internal and external teams together with real-time text, voice, and video conferencing and keep projects on track by setting action items and timelines.

Comprehensive integrations

Built as an open platform from the ground up, RingCentral is designed to easily integrate your business communications capabilities with the applications and cloud services your organization uses every day. We deliver custom-built integrations into Salesforce®, G Suite, Microsoft® Office products, and many other leading sales, marketing, and CRM applications. Our Connect Platform™ allows you to seamlessly use leading market apps out of the box, while industry-standard APIs enable your developers to leverage our open platform architecture to innovate in novel ways, adding value to existing products.

Real-time analytics

RingCentral brings you the industry's most sophisticated reporting capabilities so you can proactively monitor, analyze, and resolve issues before they can negatively affect your operations. Our powerful real-time reporting dashboards represent customizable views of your account's call performance and service quality data, providing end-to-end visibility into your business and network conditions.
