

# Partner with Black Box Powered by Meraki Access: Unlock New Opportunities in Networking

## 5 Reasons to Partner with Us

### The Latest WiFi Technologies:

Black Box uses the latest and most advanced iteration of WiFi technology that offers faster speeds, better coverage, and improved security compared to its predecessors. It enables you to enjoy faster download and upload speeds, improved connectivity, and more reliable Internet access. To add to that, our solution includes location-based services for wayfinding, asset tracking, and user engagement, which can help enhance the customer experience and improve overall operations.

### Bundled for Convenience:

With our Wireless NaaS solution powered by Cisco's Meraki Access and Black Box Financial Services, you can switch to a Bundled Model, which offers cost-effective and cutting-edge technology and services. With a Bundled Model, you'll have lower upfront costs and flexible budgeting that offers an opportunity to reinvestment in other areas of your business. This model allows you to pay for what you use and when you use it. This flexibility allows you to reduce costs and increase efficiency.

### Comprehensive Services:

Our Wireless NaaS powered by Meraki Access solution provides comprehensive services, including consulting, design, site surveys, and transformation projects. It offers you the support you need to plan, implement, and optimize your wireless network from start to finish. Our team of experts will work with you to understand your unique needs and design a solution that fits your requirements.

### 24/7 Technical Support:

Our experts in wireless network management extend support whenever you need it, no matter the time or place. Additionally, our NOC is multilingual and operates locally in over 35 countries to provide you with the best possible support. With our NOC support services, you can be confident that your network is in good hands, even when you're not there.

### Remote Managed Services:

Our Wireless NaaS solution powered by Meraki Access includes remote managed services that will provide you with access to experts in wireless network management 24/7. This enables you to focus on your business growth while we handle the complex and time-consuming process of managing your wireless network. Our remote managed services allow you to access real-time network monitoring, proactive maintenance, and expert support that help prevent downtime and improve network performance.
