

Trusted Expertise for Mission-Critical Broadcast Operations

Black Box delivers control-room technology that keeps live broadcast operations running 24/7

WHAT WE DO

- **Remote Production Control** – Access and control broadcast systems anywhere over IP or on-prem
- **Multi-System Operator Workspaces** – See and control many systems from one desk
- **Real-Time Video & Data Visualization** – Low-latency, high-quality live monitoring
- **Centralized Management** – One pane of glass for control operators

WHERE IT'S USED

- Live production control rooms
- Master control & playout
- Newsroom & studio automation
- Remote editing & post-production
- OB trucks & fly-packs
- Redundancy/backup control rooms

WHY BROADCAST COMPANIES CHOOSE BLACK BOX

- Designed for 24/7 Operations
- Frictionless Operator Experience
- True Hybrid Workflows
- Scales Without Re-Architecture
- Future-Ready IP Foundation
- Proven in High-Pressure Environments

REPRESENTATIVE BROADCAST CUSTOMERS

BLACK BOX READINESS

- Nearly 50 years delivering mission-critical control solutions
- Global deployment, service, and support footprint
- Deep broadcast engineering and systems integration expertise
- End-to-end portfolio: access, control, management, visualization
- Ready-to-demo solutions and reference architectures
- Dedicated applications engineering and design support

Our technology integrates seamlessly into existing broadcast environments, enabling media organizations to deploy Black Box solutions without disruptive infrastructure changes or complex procurement barriers.
