

VideoPlex4000 Architectural Video Wall

Experience Endless Display and Signage Possibilities

VideoPlex4000 gives users the flexibility to create uniquely shaped video walls with four or more screens and display video across multiple displays. Any signage video wall display can be freely positioned and the input can be cropped or rotated 90-270°. This signage video wall controller supports up to 4K input making it ideal for Ultra High Definition digital signage. It's the perfect solution to create visually eye-catching video walls that advertise, promote, and educate audiences while projecting messaging and content on a larger scale.
