# BLACK BOX®

When you need to make the most of your space

Total Accessibility is Within Grasp

The IN-SESSION room scheduler makes it easy to effectively manage the occupancy of boardrooms, conference rooms, lecture halls, auditoriums, classrooms and any other meeting place. With IN-SESSION, users can make instant reservations and extend or cancel existing meetings directly from the touch panel increasing meeting room efficiency. IN-SESSION also has a unique side LED indicator so people can easily determine from a distance if a room is occupied or available. This intuitive room scheduler requires no programming so set up is quick and easy.

Instant Reservation
Make immediate room reservations from the touch panel, your computer or a mobile device. Other options such as extending or canceling a meeting ensure space is used to maximum ability.

Real-Time Status
Touch panel shows current status of the room, reservation calendar and more.

Multilingual
User-friendly interface available in English, Spanish, French, German, Czech, Finnish, Latvian, Russian and Danish.

LED Indicators
Know the status of a room at a glance based on the red or green indicator lights on the side of the touch panel.

Compatibility
Compatible with Outlook, Microsoft Office 365, Microsoft Exchange Server or G Suite (Google Apps for Work).

Easy Setup
No programming required so set up is quick and easy.

Intuitive User Interface

- Room occupation or availability indication
- Current meeting displayed
- Meeting details available
- Room calendar browsing
- Current meeting extension and termination

Available in 7" or 12" versions for on-wall surface mounting or in-wall box mounting.
