

# Reserva Touchscreen Room Booking

## Transforming Meeting Room Signage

Booking a meeting room shouldn't be a hassle. Reserva room signs allow you to easily locate and instantly schedule or cancel rooms from an intuitive and customizable interface. Because Reserva is powered by the iCompel® digital signage solution, it can also be used as a dynamic communications platform. Businesses, educational institutions, and hospitality venues can advertise, build brand awareness, and share their internal communications through Reserva.

### Reserva Edge

Reserva Edge features a unique ergonomic tilted touchscreen interface. It has been designed to completely conceal wires and has a fully integrated mounting kit for both glass and walls. The large LED status bar allows users to easily see room status and can also be customized to reflect brand colors. The built-in NFC card reader enables users to check in to meetings to minimize the workspace waste from no-shows.

### Reserva Wayfinding/Meeting Summary

The Reserva Wayfinder/Meeting Summary solution shows upcoming meetings in a range of meeting rooms. Install these wayfinding systems in reception areas or beside elevators to help staff, students, or guests find where they are meeting. The content can be displayed in full-screen or multizone layout and in portrait or landscape orientations.

### Reserva Analytics

Reserva Analytics is a browser-based solution that displays individual user behavior data and room utilization data as well as a report on the technology resources within the meeting space, allowing organizations to monitor and optimize resources on an easy-to-use dashboard.

## Reserva Integrations

## Benefits and Features

### Customizable Interface

Make your conference room signage your own with a customizable interface that gives you the ability to add your organization's branding, custom content, and background style.

### Digital Signage Capability

Because they're powered by the iCompel® digital signage solution, Reserva room signs can show your content alongside the meeting room information. This can include employee communications, brand reinforcement, or advertisements.

### Interactive Wayfinding

Show information for upcoming meetings in a range of conference rooms all in one space. Display in reception areas or beside elevators to quickly and easily find the location of a meeting. Content can be displayed full screen or in a multizone layout on any interactive Reserva meeting room screen or iCompel digital signage. Digital wayfinding makes navigation simple for visitors, guests, employees, customers, or students to find their meeting room quickly.

### Monitoring, Management, and Analytics

The Reserva Connection Manager application is quick to setup and integrates with multiple calendar systems at one time. This application also gives you centralized control over the configuration of your room signage. When connected to the iCompel CMS, room signs can be remotely monitored with features like remote screenshot, support snapshot, and offline. Analytics enable you to monitor conference and meeting room space use and make the most of available resources.

### Security

Best-in-class security framework based on the iCompel proprietary Linux® operating system. You can update the full software stack remotely over the network, benefiting from a continual platform and security updates.

### NOTES:

\*Additional licensing required to enable features.

\*\*Digital Signage Player or CMS may also be required.
