

## Securing Clients at the Speed of Innovation

A suite of comprehensive, innovative & full lifecycle cybersecurity services.

Black Box is at the forefront of delivering industry-leading cybersecurity solutions and services, safeguarding clients from devastating cyberattacks while enabling their digital transformation journey. Headquartered in the US, our global delivery model empowers us to serve clients across industries worldwide. We focus on providing outcome-based services tailored to each client's unique security challenges and needs. Leveraging cutting-edge cybersecurity platforms, robust processes, and deep expertise, we deliver comprehensive detection, protection, and response to emerging cyber threats. Black Box proudly secures global customers across 30+ countries with our trusted security solutions and services.

### OUR PORTFOLIO

# Why choose **Black Box** as your preferred cybersecurity partner?

With a combination of automation capabilities, matured processes, and certified security professionals, Black Box delivers comprehensive and detail-oriented security services. Our services are based on the axiom philosophy, **"Cybersecurity is not a technology issue; rather it is a business priority"**. Hence, we first try to understand the business priorities of our clients and align our security solutions and services, accordingly. At Black Box, excellence is embedded in our DNA. Being assured that their operations are well-protected against cyber threats, our clients confidently navigate today's digital landscape. As their cybersecurity partners, we not only protect their current operations but also prepare them to embrace their evolving digital transformation journey safely.
