Black Box Limited

Investor Presentation

Q2FY23

SAFE HARBOUR

*This presentation and the accompanying slides (the “Presentation”), which have been prepared by **Black Box Limited** (Formerly AGC Networks Limited), have been prepared solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment whatsoever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.*

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

This presentation contains certain forward-looking statements concerning the Company’s future business prospects and business profitability, which are subject to a number of risks and uncertainties and the actual results could materially differ from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, our ability to manage growth, competition (both domestic and international), economic growth in India and abroad, ability to attract and retain highly skilled professionals, time and cost over runs on contracts, our ability to manage our international operations, government policies and actions regulations, interest and other fiscal costs generally prevailing in the economy. The Company does not undertake to make any announcement in case any of these forward-looking statements become materially incorrect in future or update any forward-looking statements made from time to time by or on behalf of the Company.

Q2 & H1 FY23 HIGHLIGHTS

H1FY23 FINANCIAL HIGHLIGHTS

Revenue
Rs. 2,934 Crs

EBITDA
Rs. 103 Crs

PAT
Loss of Rs. 7 Crs

- **Revenue** in H1FY23 grew by 15% YoY. This growth is primarily due to execution of projects from large order backlog and continued economic activities. Momentum on new bookings continues to be strong
- **Gross margins** continues to be under pressure due to no respite on inflation in US and Europe, added with overall supply chain challenges has resulted in lower **EBITDA**
- **PAT** loss is largely due to an exceptional item related to employee severances paid to improve our onshore-offshore ratios and change in rookie mix. We expect these actions to be accretive by end of Q4 FY23

ROBUST BALANCE SHEET

Total Borrowings

In Rs. Crores

- Additional debt drawn in H1 FY23 for working capital requirements to mitigate supply chain disruptions and project delays
- As on 30th Sept 2022, company had cash and cash equivalents of Rs. 250 Crores

Net-Worth

In Rs. Crores

- The final tranche of Rs 37 Crores for the warrant issue is received on May 22. There is no outstanding amount against the Rs 225 Crores warrant subscriptions

*March 2021 net worth includes warrant subscription amount of Rs. 188 crs

STRENGTHENING OF BALANCE SHEET – SCHEME OF REDUCTION OF SHARE CAPITAL

- Board of Directors, considered and approved the scheme of reduction of share capital to set-off accumulated losses with Capital Reserve and Securities premium in the standalone books of the Company. The scheme is subject to approval of shareholders, Hon'ble National Company Law Tribunal, Mumbai and all other regulatory approvals
- The said scheme does not result into any change / reduction in share capital structure of the company and serves as merely a set-off in the books of the company whereby debit balance in P&L account is getting adjusted / set-off against the credit balance in the share premium account and capital reserve account. Further, the scheme does not result in any benefits to promoter / promoter group / group companies to exclusion of other shareholders

Rational for restructuring:

- The accumulated losses of the company have wiped off the value represented by the share capital. This has given to the need for readjustment of capital reserve and securities premium in its books of accounts
- The restructuring would enable the company to have a rational structure which is commensurate with its remaining business and assets and the books of the company would better represent its financial position
- Hence the Board of Directors have proposed the scheme, which is in accordance with section 66 read with section 52 and other provisions of the Companies Act, 2013.

Quantitative and / or qualitative effect of restructuring:

- Company proposes to write off accumulated losses of Rs. 107.95 Crores reflecting in audited standalone financial statements as on 31st March 2022 with balance appearing in Capital reserve account and Securities premium account
- With the scheme coming into effect, balance in Capital reserve account be reduced from Rs. 22.64 Crores to nil and balance in Securities premium account be reduced from Rs. 223.11 Crores to Rs. 137.80 Crores
- The scheme will enable company to provide a true and fair view of its financial position.

MANAGEMENT COMMENTARY

Commenting on the results and performance **Mr. Sanjeev Verma, Whole-time Director, Black Box** said,

“For the quarter, we witnessed a 15% growth in our revenues on sequential basis which demonstrates our healthy order book and strong execution capabilities, despite of challenging economic environment. Our revenues and order book continue to grow at a steady pace. We are moving towards being a ratio-centric organization owing to which we are rationalizing our employee base, and this will result in an improvement in overall profitability going forward. We continue to remain optimistic on overall business going ahead.”

Mr. Deepak Kumar Bansal, Executive Director and Global Chief Financial Officer of Black Box, said,

“Inflationary trends, non-availability of components and higher supply chain costs continue to put pressure on our gross margins. We have rationalized costs and have incurred severance costs to make our offshore-onshore ratio more effective. We continue to focus on various gross margin improvement initiatives and are hopeful to achieve desired outcome by end of Q4 FY23.”

DEAL WINS OF \$30 MILLION+ DURING THE QUARTER

Transaction Value	Clients
\$8.9 Mn	Data Center and In-Building 5G/OnGo solutions for an American online social media and social networking service
\$7.0 Mn	Connected Building and Enterprise Networking solutions for a Mexican multinational company
\$6.2 Mn	Connected Building and On-Demand solutions for an American multinational corporation and technology company
\$4.5 Mn	KVM Solutions for a European Defence organization
\$2.6 Mn	Digital Workplace solutions for a US government-owned rapid transit system
\$2.6 Mn	Enterprise Networking and On-Demand solutions for an Italian multinational renewable energy corporation
\$1.9 Mn	Digital Workplace and Enterprise Networking solutions for an American biotechnology corporation
\$1.7 Mn	Digital Workplace solutions for an American company selling roofing products
\$1.2 Mn	Audio-Video solutions for a European military aviation branch

IMPROVING FINANCIAL FLEXIBILITY

Promoter Funding

Balance Sheet Strength

Credit Rating

- In May 2022, the final warrant tranche of Rs. 37 crores is received. With this, Rs 225 Crores from the warrant offer has been fully received and the shares has been issue. Promoter shareholding stands at 71.14% as of 30th September 2022
- Money is being utilized to meet the growth requirements of the company, reduction in liabilities and general corporate purposes

- Transformation at Black Box has improved the financial strength
- Promoter funding to help in increasing the net worth further and reduce the liabilities
- Cash & Cash equivalents as on 30th Sep'22: Rs. 250 Crores

- CRISIL has assigned BBB/Stable rating (Investment Grade) to the long-term facilities and CRISIL A3+ for short-term facilities
- Ratings reflect upon healthy business risk profile, driven by the established market position and the improving profitability & cashflows of the company

The Financial Flexibility will help to:

- ✓ Improve business offerings and acquire larger customers
- ✓ Extend business within existing markets to build scale and size
- ✓ Faster growth through inorganic acquisitions

INORGANIC STRATEGY

ONE

NAME
BRAND
LANGUAGE

INORGANIC GROWTH STRATEGY

Identify Businesses that provides expansion through scale and revenues currently operating with sub-optimal margin profile

- ✓ Capability expansion in areas like Cloud, Data center, Cyber Security, IOT
- ✓ Geographic expansion within US and Europe and APAC

Complementary to existing business

- ✓ Scale up existing businesses
- ✓ Acquire new customers
- ✓ Diversify to newer geographic locations
- ✓ Acquire capabilities in newer delivery verticals and solutions

Transform the acquired entities

- ✓ Execute short term synergies
- ✓ Identify and implement mid-term transformation opportunities
- ✓ Exit non-strategic, low margin revenue segments
- ✓ Simplify capital, financial and tax structure

ACQUISITION HISTORY

Company Acquired	Rationale
Dragonfly Technologies Pty Ltd (Sept'21)	<ul style="list-style-type: none"> Provides a wide range of solutions/Service Offerings largely classified into Cyber Security, Enterprise Networking, Automation and Consulting Services Rationale is to strengthen its presence in Australia and also add cybersecurity capabilities to offer wider range of services to our customers. This will also give rise to an opportunity to cross sell to the current customers
Mobiquest (Singapore) (Jan'21)	<ul style="list-style-type: none"> Custom application development to enable clients to manage data integration with legacy systems Digitized and automated processes and workflows to monitor and manage key performance indicators (KPIs) to improve visibility and boost operational efficiency Digital transformation services with end-to-end lifecycle management of software applications with application services through technologies such as RPA, blockchain, AI/ML and IoT
Pyrios Pty Ltd (Australia) Pyrios Pty Ltd (New Zealand) (Aug'20)	<ul style="list-style-type: none"> Increase and strengthen Company's presence and offerings in the Australia and New Zealand market Enhance the current solution portfolio the Company in the Unified Communications and Contact center space and Cloud services
Fujisoft Technologies UAE (May'20)	<ul style="list-style-type: none"> Establish and scale presence in Middle East region Enhance the current solution portfolio across Cloud Computing & Virtualization, Cyber Security, Managed SoC & NoC, Managed Services, Data Center and Collaboration solutions Opportunity to cross sell between the current customers of Black Box and the acquired Companies
Black Box Corporation (Jan'19)	<ul style="list-style-type: none"> Expands offerings, scale, and Geographic reach to Service Global Enterprise Clients Increased combined revenues of the Company by over \$600mn

Strategic Objectives Fulfilled

- ✓ Business that provides expansion through scale and revenues currently operating with sub-optimal margin profile
- ✓ Complementary to existing business
- ✓ Transform the acquired entities

CASE STUDY – DIGITAL INFRASTRUCTURE

Contact Center Infrastructure Upgrade for an Indian Logistics Company

THE CLIENT

Our client is an Indian Logistics Company providing courier delivery services & has a subsidiary cargo airline that operates in South Asian countries

THE CHALLENGE

The client decided to upgrade their existing Contact Center technology that was obsolete and move on to a robust optimized architecture so as to ensure maximum uptime

THE SOLUTION

Black Box demonstrated the benefits of a centralised vs. decentralised set-up and optimised the design by utilising their current infrastructure. This involved Contact Center consolidation with back-office soft-phones. This agreement showed Black Box's Professional Services as a Solution Integrator

BENEFIT

A future-ready solution with low Total Cost of Ownership and high uptime

CASE STUDY – UNIFIED COMMUNICATIONS & COLLABORATION (UCC)

Seamless Migration for Voice Technology Service

THE CLIENT

This healthcare provider is acknowledged globally for its clinical competence in six specialties, from cardiology/heart surgery to neurology/neurosurgery

THE CHALLENGE

The client was utilizing PRI, an outdated voice technology service that lacks redundancy and scalability. In addition, the client's current service provider (as well as others) were phasing out legacy PRI services in the region

THE SOLUTION

Black Box provided an up-to-date voice technology service delivering 2,000 SIP call paths over a redundant MPLS network. The on-site Black Box technical team enabled a seamless migration from the old to the new system

BENEFIT

The new centralized SIP service gave the client flexibility and scalability to add capacity as needed and redundancy with failover between circuits. Best of all, it reduced the client's voice technology service costs by nearly 30%

CASE STUDY – DATA CENTER & ENTERPRISE NETWORKING AND 5G / ONGO

Ubiquitous, 5G-Ready Wireless Coverage

THE CLIENT

This large, university-based healthcare system cares for tens of thousands of patients a year. It is world renowned for its neuroscience, cancer research and treatment capabilities

THE CHALLENGE

The client needs to provide mission-critical cellular coverage in multiple existing and new buildings across its very large campus. The wireless coverage is designed for use by physicians, staff, patients, and visitors

THE SOLUTION

Black Box has, so far, designed and installed the CommScope IONera Digital Distributed Antenna (DAS) System with more than 500 universal access points (UAPs) in nine buildings across the campus

BENEFIT

Future-ready and 5G capable, the DAS system provides ubiquitous, multioperator, in-building wireless coverage to support physician/staff communications and patient/visitor satisfaction

CASE STUDY – CYBER SECURITY

Turn-key Vulnerability and Gaps Assessment for Geauga County

THE CLIENT

Geauga County, a county in the U.S. state of Ohio, in support of the richly dynamic culture of its citizenry, required a robust, secure, and vulnerability free IT infrastructure

THE CHALLENGE

- Visibility
- Cyber security gaps
- Cyber security risks
- Security policies addressing the new privacy & security compliance requirements

THE SOLUTION

- Vulnerability and gaps assessment on external and internal IT infrastructure
- Series of reports identifying the findings, risks, & remediation efforts
- Remediation engineering, security policy vCISO services & security program maturity development

BENEFIT

- Optimization of security assets
- Devices and systems hardening
- Improved security posture
- Security policy ensuring privacy and safety protections

STRONG RELATIONSHIP WITH GLOBAL TECH PARTNERS

TECHNOLOGY PRODUCTS SOLUTIONS

TPS provides connectivity that enables businesses to better visualize and analyse information

- ✓ Strong brand awareness with 40+ years of history with sizable installed base

OUR PRODUCT PARTNERS

Leveraging our Relationships with Global Distributors

CASE STUDY - KVM

Broadcaster Builds Studios on Black Box Emerald KVM-over-IP Platform

THE CLIENT

A broadcaster teamed with a global systems integrator to plan and deploy his new broadcast center with multiple control rooms, studios, and workplaces for 3000 employees

THE CHALLENGE

Customer's desire was to enable flexible IP-based signal switching and extension connecting physical and virtual systems, with studios, control rooms, and operators using a high degree of automation putting people and news at the center

THE SOLUTION

The Black Box Emerald KVM-over-IP solution became the favored choice to deliver reliable, flexible IP-based signal switching and extension. The system connects in total 1.000 endpoints using a variety of Emerald models that meet individual requirements while working perfectly together

BENEFIT

The complete Emerald solution delivered high availability and scalability, interoperability between 4K and HD, remote app, and a market-leading low bandwidth consumption for maximum expandability and flexibility

CASE STUDY – NETWORKING

KVM Solutions deployed for the Defence Sector in the NORDICS

THE CLIENT

A solutions integrator and Black Box customer involved in secure networking systems

THE CHALLENGE

The customer needed a software solution that enabled them to improve security by locking custom-built servers in an EMP-shielded server room while employees worked in an open-office environment

THE SOLUTION

The customer already had KVM extender solutions they were happy with, but they lacked secure HDMI connections. Black Box designed a DKM KVM extension network that met the customer's exact connectivity requirements plus had transparent support for USB card readers at 44 user desks

BENEFIT

Customer can now secure 44 PCs in an EMP-shielded environment to avoid exposure to outside interference or tampering. Because Black Box provided a pilot installation before the customer placed an order, the customer was able to test the solution before placing the large order

CASE STUDY – NETWORKING

Environmental Monitoring for a Railway System

THE CLIENT

The client is one of the oldest Ministry of Transportation and Communications in the world operating and maintaining more than 60 in-house data centers

THE CHALLENGE

Replace the railway's legacy remote environmental monitoring system that included some damaged hardware and out-of-date, proprietary, customized software which tied them to using only the original supplier

THE SOLUTION

To keep the railway's network operating without heat or humidity damage, Black Box deployed the AlertWerks Wired Monitoring System. The system was installed in 18 control rooms with the dual temperature & humidity controls, smoke detectors, and door access sensors

BENEFIT

The system integrates with other devices, such as IP cameras and UPSs, for flexibility. It also provides personnel flexibility as no professional training is needed for system configuration. Managed by a GUI-enabled software program, IT administrators can easily expand or update the system ← 46 →
