AIONOS & BLACK BOX FORGE STRATEGIC ALLIANCE TO SCALE AI-LED INFRASTRUCTURE AND APPLICATIONS

CP Gurnani and Sanjeev Verma to steer the alliance's global expansion, driving digital impact across enterprises and hyperscalers.

Mumbai/Gurugram, India, June 1, 2026 — Black Box Limited (BSE: 500463 | NSE: BBOX), a leading global digital infrastructure integrator, and AIONOS, an AI-native enterprise technology company, today announced a strategic alliance to help enterprises accelerate AI transformation; from infrastructure build-out to measurable business outcomes.

The alliance combines Black Box's expertise in digital infrastructure, including data centers, network connectivity, modern workplace solutions, and managed services, with AIONOS's applied AI platforms and domain-led solutions, enabling organizations to build, deploy, and manage AI with security and resilience embedded at every layer.

CP Gurnani, Co-Founder & Vice Chairman, AIONOS said, *"India is at an extraordinary inflection point. We are not just consuming AI, we are building it, exporting it, and setting the agenda for how the world deploys intelligent technology at scale. This alliance between AIONOS and Black Box is a direct expression of that belief. Black Box brings the digital infrastructure engine spanning data centers, enterprise networks, and IoT across 35+ countries, and together we cover the entire journey from the physical layer to the AI application layer."*

The two companies will jointly collaborate in developing industry-focused solutions and expanding go-to-market opportunities across India, North America, EMEA, and APAC. In India, a key focus area will be the rapidly expanding Global Capability Centre (GCC) ecosystem, where the alliance is uniquely positioned to help GCCs build AI-ready infrastructure, deploy enterprise-grade AI solutions, and create intelligent, scalable operations that integrate seamlessly with their global parent organizations.

"AI transformation begins with a strong digital foundation, and Black Box enables that foundation through mission-critical infrastructure, connectivity, and managed services that power enterprise operations worldwide. Combined with AIONOS's applied AI platforms and domain expertise, we can help organizations move from AI ambition to AI at scale, connecting infrastructure, operations, and intelligence to create measurable business value." said, **Sanjeev Verma, President & CEO, Black Box**

What Enterprises Gain Through This Alliance

For enterprises, this alliance delivers a unified approach to AI adoption across the full technology stack, from digital infrastructure and OT/IoT connectivity to industry-specific AI solutions, with security, resilience, and governance built into every layer. Every engagement is anchored in measurable business outcomes, including productivity improvements, cost optimization, revenue growth, and competitive differentiation, delivered through a single, globally capable, end-to-end alliance.

"Enterprises do not need more AI ambition. They need a partner who can make AI real across their entire business. That is exactly what this alliance is built for. AIONOS brings the AI platform, data capabilities,

and vertical intelligence. Black Box brings the global infrastructure and delivery scale. Together, we give enterprises a single, accountable partnership that owns the transformation journey, from infrastructure to intelligence, from strategy to outcomes.", concluded, **Simmi Dhamija, Chief Operating Officer, AIONOS**

About AIONOS

AIONOS (pronounced aye-yo-nos) is an AI-native technology company that builds and operates enterprise AI for industries. Founded in 2024 and headquartered in Singapore, AIONOS is a joint venture between InterGlobe Enterprises and Assago Group, bringing together deep enterprise technology expertise and sector-defining operational experience. With live operations across the USA, UK, Europe, the Middle East, Japan, APAC, ANZ, and India, the company deploys a workforce of 2,500+ AI engineers, domain specialists, and practitioners across Aviation, Travel & Hospitality, Logistics, Telecom, BFSI, and Healthcare. Powered by its proprietary AI enterprise stack, AIONOS delivers measurable business outcomes through an accountable, human-in-the-loop model that sits on top of existing enterprise investments.
