

Boost Your WLAN with Black Box's Pay-Per-Use Managed Services

As a premier Managed Service Provider, Black Box, in partnership with Extreme Networks, delivers tailored WiFi solutions to boost performance and scalability. Our flexible pricing and deployment models offer zero investment in access point (AP) hardware, with a pay-per-use model ensuring optimal usage of hardware & services with scalability. Flexible deployment options and predictable quarterly payments further streamline costs. With enterprise-grade security, AI-powered management, and a secure ISO27001 and GDPR-compliant CLOUDIQ management platform, we simplify your operations and keep your infrastructure future-ready. Explore how our MSP offerings can elevate your business with precision and agility.

Integrated MSP Offerings to Maximize Performance

Our MSP services provide WLAN network management to help businesses refresh, expand, and transform their operations while maintaining high performance and security standards, all while ensuring hardware warranty & TAC support of OEM till the validity of the contract.

Enterprise-Grade Performance Across WiFi

WiFi 6 Support:

Future-proof your business with Extreme Networks' WiFi 6 technology, offering faster speeds, lower latency, and support for multiple devices.

High-Speed Connectivity:

Our infrastructure supports high-bandwidth applications, such as HD streaming, video conferencing, and online gaming, ensuring a seamless user experience.

Scalable Infrastructure:

Expand your network effortlessly across multiple locations, buildings, or floors without compromising performance.

Operational Efficiency and Cost-Effective Solutions

Streamlined Management:

Our AI-based unified management reduces the need for extensive IT staffing, allowing you to focus on core business functions while minimizing costs for skilled resources.

Fault Resolution:

Our automated diagnostics and troubleshooting processes significantly reduce network downtime, ensuring your operations run smoothly.

Proactive Maintenance and Support: :

We manage network maintenance proactively to prevent disruptions, while offering comprehensive hardware warranty and tech support for valid contracts, ensuring swift issue resolution and continuous operation.

Advanced Security and Data Privacy

WPA3 Encryption:

WLAN infrastructure provides enterprise-grade WPA3 encryption, ensuring top-level security for all your devices.

Data Privacy:

We secure your sensitive data with encrypted transmissions and user authentication protocols to protect against breaches.

Guest WiFi Access:

We provide visitors with a secure, separate network to access the Internet without affecting internal systems.
