

AV Solutions

Providing **Tailored AV Solutions** to Transform Collaboration Spaces.

Collaboration spaces now play a pivotal role in merging onsite and remote, culture, and engagement, whether it's in conference rooms, waiting areas, lobbies, or huddle spaces. Our cutting-edge audio-visual technology features facilitate integration keeping both people and spaces in mind and creating employee-centric workflows that fuel innovation. With our AV designs, you can harmonize in-room and remote collaboration experiences, enabling seamless interactions, presentations, and idea sharing while breaking down barriers and uniting everyone as a cohesive team.

At Black Box, our commitment to excellence goes beyond the mere act of **"handing over the keys."** To ensure the longevity and efficiency of your system, we go the extra mile by layering preventative maintenance measures into our approach. We aim to identify and address potential issues before they can escalate, safeguarding your system from unexpected disruptions and costly downtime through:

Regular Inspections

Scheduled Check-ups

Proactive Troubleshooting

With our **critical onsite support**, we promptly address any challenges that remote solutions may not adequately resolve. Our highly skilled technicians are readily available to visit your location and provide expert assistance, ensuring minimal disruption to your operations and swift resolution of any technical hitches.

With a comprehensive combination of preventative maintenance and responsive onsite support, we strive to deliver a holistic and dependable service that goes above and beyond, ensuring your system continues to operate at its peak performance, contributing to your organization's success and peace of mind.

Consulting and Design Services

Articulating ideas and executing plans into a fully realized design and implementation, our professional services:

- Connect you with the right technology model that meets your stated objectives
- Help you develop a flexible, advanced network
- Provide expert project oversight, flawless execution, and savvy ongoing management

With comprehensive design and engineering services for data, voice, AV, and other specialty networks, your business will benefit from a holistic and innovative IT investment that reduces risk, adapts to change, and boosts ROI.

Customer Success Stories

Driving Sales with Interactive In-Store Signage

A nationwide retailer needed a digital signage solution that would display in-store advertising featuring new products and up-and-coming trends. To give customers more product details, the solution needed to be interactive with mini touch-screen displays. We created the solution and deployed it in more than 80 stores, and followed up with post-installation support services.

7 Trends in Post-COVID AV

How AV is Shaping the Hybrid Workplace

Here are the seven trends in AV technology that are shaping and changing the hybrid workplace and how teams work safely and efficiently.

- The Death of the Cube Farm
- Digital Signage
- Touchless Technology
- Occupancy, Environmental, and Health Sensors
- Scheduling Systems
- Seamless Room/Zoom Experiences
- Intuitive Technology
